

GT eFORMS™
MAKES IT EASY!

Configuration-based page design...

...rule-based form logic...

...and configurable workflow

GT eForms™ for PeopleSoft Campus Solutions

Are you relying on paper forms and manual processes for many of your student-related actions – student onboarding, cancellations and withdrawals, course and curriculum changes, course fee adjustments, student record change requests, changes of major? Imagine being able to automate all of these as powerful, intuitive, self-service applications.

GT eForms™ for PeopleSoft can transform any of these traditionally form-based processes into efficient, workflow-enabled, electronic forms. Empower your business analysts to create easy-to-use electronic forms and self-service applications for prospective students, undergrads, graduate students, faculty, staff, and alumni.

- Create forms to automate and streamline processes like *student withdrawals* and *cancellations*, featuring configurable business logic, approval routing, and email notifications to comply with your institution’s policies and procedures.
- Automate *financial aid forms* to simplify and speed the process of applying for grants, scholarships, and loans. eForms can calculate values; conditionally display specific fields, segments, and pages based on data input by the student; and enforce eligibility rules.
- Integrate eForms with existing *student and faculty self-service centers* for easy navigation and the ability to track the status of any eForm at any time.
- Seamlessly connect PeopleSoft-based eForms with non-PeopleSoft applications to *share and update data across multiple sources*.

Validated Integration
PeopleSoft Campus
Solutions

GT eForms™ - The Fastest Way to Custom PeopleSoft Automation

GT eForms™ provides a powerful PeopleSoft-based framework and robust toolset for creating custom self-service applications and workflow-enabled electronic forms, where business analysts can configure and control page design, form logic, and workflow, with minimal or no technical intervention. Extensive configuration-based form functions to empower business analysts to design and manage:

- ■ ■ Form appearance and layout;
- ■ ■ Auto-population and defaulting of form data based on your organization's unique business rules;
- ■ ■ Conditional business logic (e.g. which pages, segments, fields and valid values are displayed to which users under what conditions);
- ■ ■ Dynamic dependencies to determine prompt values for fields based on the data entered in preceding fields;
- ■ ■ Approval routing and workflow leveraging PeopleSoft's powerful Approval Framework;

NATIVE PEOPLESOFT INTEGRATION

As a PeopleTools-based bolt-on, GT eForms™ uses your existing PeopleSoft system to deliver solutions that are fully-integrated and easy to use. Leveraging your existing PeopleSoft security, infrastructure, and data, you control who can initiate and access which forms, and what data they can see under what conditions. Configuration-based integration with the PeopleSoft Approval Framework provides full flexibility in defining even the most complex approval routings.

eForm Templates for PeopleSoft Campus Solutions

Colleges and universities have automated dozens of student and faculty actions for PeopleSoft Campus Solutions using GT eForms™, including such processes as grade change requests, readmission applications, financial aid forms, changes of major, and many more. Some of the templates available to GT eForms™ licensees include:

Grade Change Requests

Empower faculty members to request changes and route for approval after final grades have been posted. Once approved, the form automatically updates the student's record.

Changes to Academic Program / Plan

Extend online self-service to enable students to request changes to their Academic program, plan or sub-plan. Workflow and email notifications can include student, advisors, faculty, and administration. Updates are reflected in PeopleSoft after final approval.

Transfer Credit Pre-Approvals and Evaluations

Allow students to initiate a pre-approval or re-evaluation of transfer credits. Form updates PeopleSoft once approved.

Student Withdrawal / Cancellation

Provide an online option for students to withdraw from the institution prior to the start of or during the term. Initiator can be configured to be a student or faculty member. Form actions can include notifications and system updates for financial aid, student financials, and others.
