

Part-Time Object-Oriented Developer

Opportunity Description

Gideon Taylor is seeking a **part-time object-oriented developer** who is ready to learn new, highly marketable skills and languages, and for the opportunity to work directly with enterprise customers to improve their lives through business process automation.

- \$12 to \$15 / hr to start
- Opportunity to advance to Full-time

IT career advisors tell you to find and specialize in a skill set that few people have, for which there is high, long-term demand and a steep barrier to entry, because that is the path to strong compensation and career security. The problem is, how do you get over the barrier to entry yourself and break into such a field?

This job opportunity is a way into just such an elite industry.

Gideon Taylor is seeking the sharpest **student developers** to be trained in a programming language and skill set that we and many top companies depend on – but that isn't taught in universities. These skills will dramatically increase your earning power upon graduation – and we'll pay you to learn them!

Our long-term goal is to groom the most successful of our student developers to join our consulting team after graduation, with the opportunity to be earning over \$100K within two years.

Company Description

Gideon Taylor is a growing consulting and software company with a vision of revolutionizing the business processes of our clients using our custom electronic forms toolkit application, GT eForms™ for PeopleSoft. Based in beautiful Pleasant Grove, Utah, Gideon Taylor is customer focused and results driven, and gives top priority to hiring and retaining bright, motivated, values-driven people to carry the vision of our firm to our top-tier enterprise clients, like the City of Boston, the University of Florida, and Brigham Young University. We are experiencing strong growth and sharp interest in our solutions, and anticipate increasing opportunities for those who join our team. Learn more at www.gideontaylor.com.

Responsibilities

The developer's primary responsibility is to develop and support GT eForms™-based solutions for our clients. GT eForms™ is a bolt-on toolset for PeopleSoft, the Oracle-owned enterprise software suite that drives the core business processes of thousands of the world's leading companies and organizations. **We will train the successful applicants on both PeopleSoft and Gideon Taylor (GT) technologies.** These projects require the ability to interact confidently in a team environment that includes GT colleagues and client professionals.

The developer will:

■ ■ GIDEON TAYLOR

- Train on target skill sets, including PeopleTools and PeopleCode, Web Services, and SQL, in both self-guided and instructor-led environments.
- Develop new product features and enhancements.
- Analyze client issues, troubleshoot their problems, and drive them to successful resolution.
- Create training applications and materials for existing and emerging products and document them.

This position will be challenging, rewarding, fun, and appropriately compensated.

Qualifications

- Major in Computer Science or a related, programming-intensive field, with at least two semesters of OO programming courses successfully completed. Recent graduates may also apply, with the possibility of immediate full-time work.
- 1-3 years of object-oriented programming experience (which language is not important, as long as it is OO).
- Willingness to learn at an escalated pace.
- Must be able to read, write, fluently speak and understand the English language. Not accepting H-1B at this time.
- Type 35+ WPM.

Required Skills

- Confidence, creativity, persuasive written and verbal communications skills, and a relentless dedication to our client's success.
- Ability to think critically and creatively, while following our methodologies and philosophies.

Desired Skills

- SQL
- **Web technologies, including Web Services, SOAP, REST, Ajax, XML, HTML5, Mobile a plus.**

Position Details

- Part-time with advancement opportunities
