

GT eFORMS™  
MAKES IT EASY!

Configuration-based page design...

...rule-based form logic...

...and configurable workflow

## GT eForms™ for PeopleSoft Campus Solutions

Looking for more automation for your student-related actions - student onboarding, cancellations and withdrawals, course and curriculum management, course fee adjustments, student record changes, changes of major? Imagine being able to automate these as powerful, intuitive, self-service applications.

Let GT eForms™ for PeopleSoft can transform your form-based processes into efficient, workflow-enabled, electronic forms. Empower your business analysts to create easy-to-use electronic forms and self-service applications for prospective students, undergrads, graduate students, faculty, staff, and alumni.

- Create forms to automate and streamline processes like **student withdrawals** and **cancellations** that fully comply with your institution's unique policies and procedures.
- Automate **financial aid forms** to simplify the process of applying for grants, scholarships and loans. Calculate values; conditionally display specific fields, segments, and pages based on data input by the student; and enforce eligibility rules.
- Integrate eForms with existing **student and faculty self-service centers** for easy navigation and access.
- Seamlessly connect PeopleSoft-based eForms with non-PeopleSoft applications to **share and update data across multiple sources**.
- Select the **Fluid user interface** within the configuration settings in GT eForms to enable mobile, device-independent form automation. Your students, faculty and staff can access eForms anytime, anywhere.

Validated Integration  
PeopleSoft Campus  
Solutions

## GT eForms™ - The Fastest Way to Custom PeopleSoft Automation

GT eForms™ provides a powerful PeopleSoft-based framework and robust toolset for creating custom self-service applications and workflow-enabled electronic forms, where business analysts can configure and control page design, form logic, and workflow, with minimal or no technical intervention. Extensive configuration-based form functions to empower business analysts to design and manage:

- ☰ Form appearance and layout;
- ☰ Auto-population and defaulting of form data based on your organization's unique business rules;
- ☰ Conditional business logic (e.g. which pages, segments, fields and valid values are displayed to which users under what conditions);
- ☰ Dynamic dependencies to determine prompt values for fields based on the data entered in preceding fields;
- ☰ Approval routing and workflow leveraging PeopleSoft's powerful Approval Framework.

## eForm Templates for PeopleSoft Campus Solutions

**Colleges and universities have automated dozens of student and faculty actions for PeopleSoft Campus Solutions using GT eForms™, grade change requests, readmission applications, financial aid forms, changes of major, and many more. Some of the templates available to GT eForms™ licensees include:**

### Grade Change Requests

Empower faculty members to request changes and route for approval after final grades have been posted. Once approved, the form automatically updates the student's record.

### Transfer Credit Pre-Approvals and Evaluations

Allow students to initiate a pre-approval or re-evaluation of transfer credits. Form updates PeopleSoft once approved.

### Changes to Academic Program / Plan

Extend online self-service to enable students to request changes to their Academic program, plan or sub-plan. Workflow and email notifications can include student, advisors, faculty, and administration. Updates are reflected in PeopleSoft after final approval.

### Student Withdrawal / Cancellation

Provide an online option for students to withdraw from the institution prior to the start of or during the term. Initiator can be configured to be a student or faculty member. Form actions can include notifications and system updates to financial aid, student financials, and others.

## NATIVE PEOPLESOFT INTEGRATION

*As a PeopleTools-based bolt-on, GT eForms™ uses your existing PeopleSoft system to deliver solutions that are fully-integrated and easy to use.*

*Leveraging your existing PeopleSoft security, infrastructure, and data, you control who can initiate and access which forms, and what data they can see under what conditions.*

*Configuration-based integration with the PeopleSoft Approval Framework provides full flexibility in defining even the most complex approval routings.*

*PeopleSoft's Fluid User Interface within GT eForms™ delivers dynamic, mobile-enabled forms for students, staff and faculty members on the go.*
