INTRASEE'S APPROACH

© 2005-2016 IntraSee, Inc.
Proprietary and Confidential

OUR BELIEF

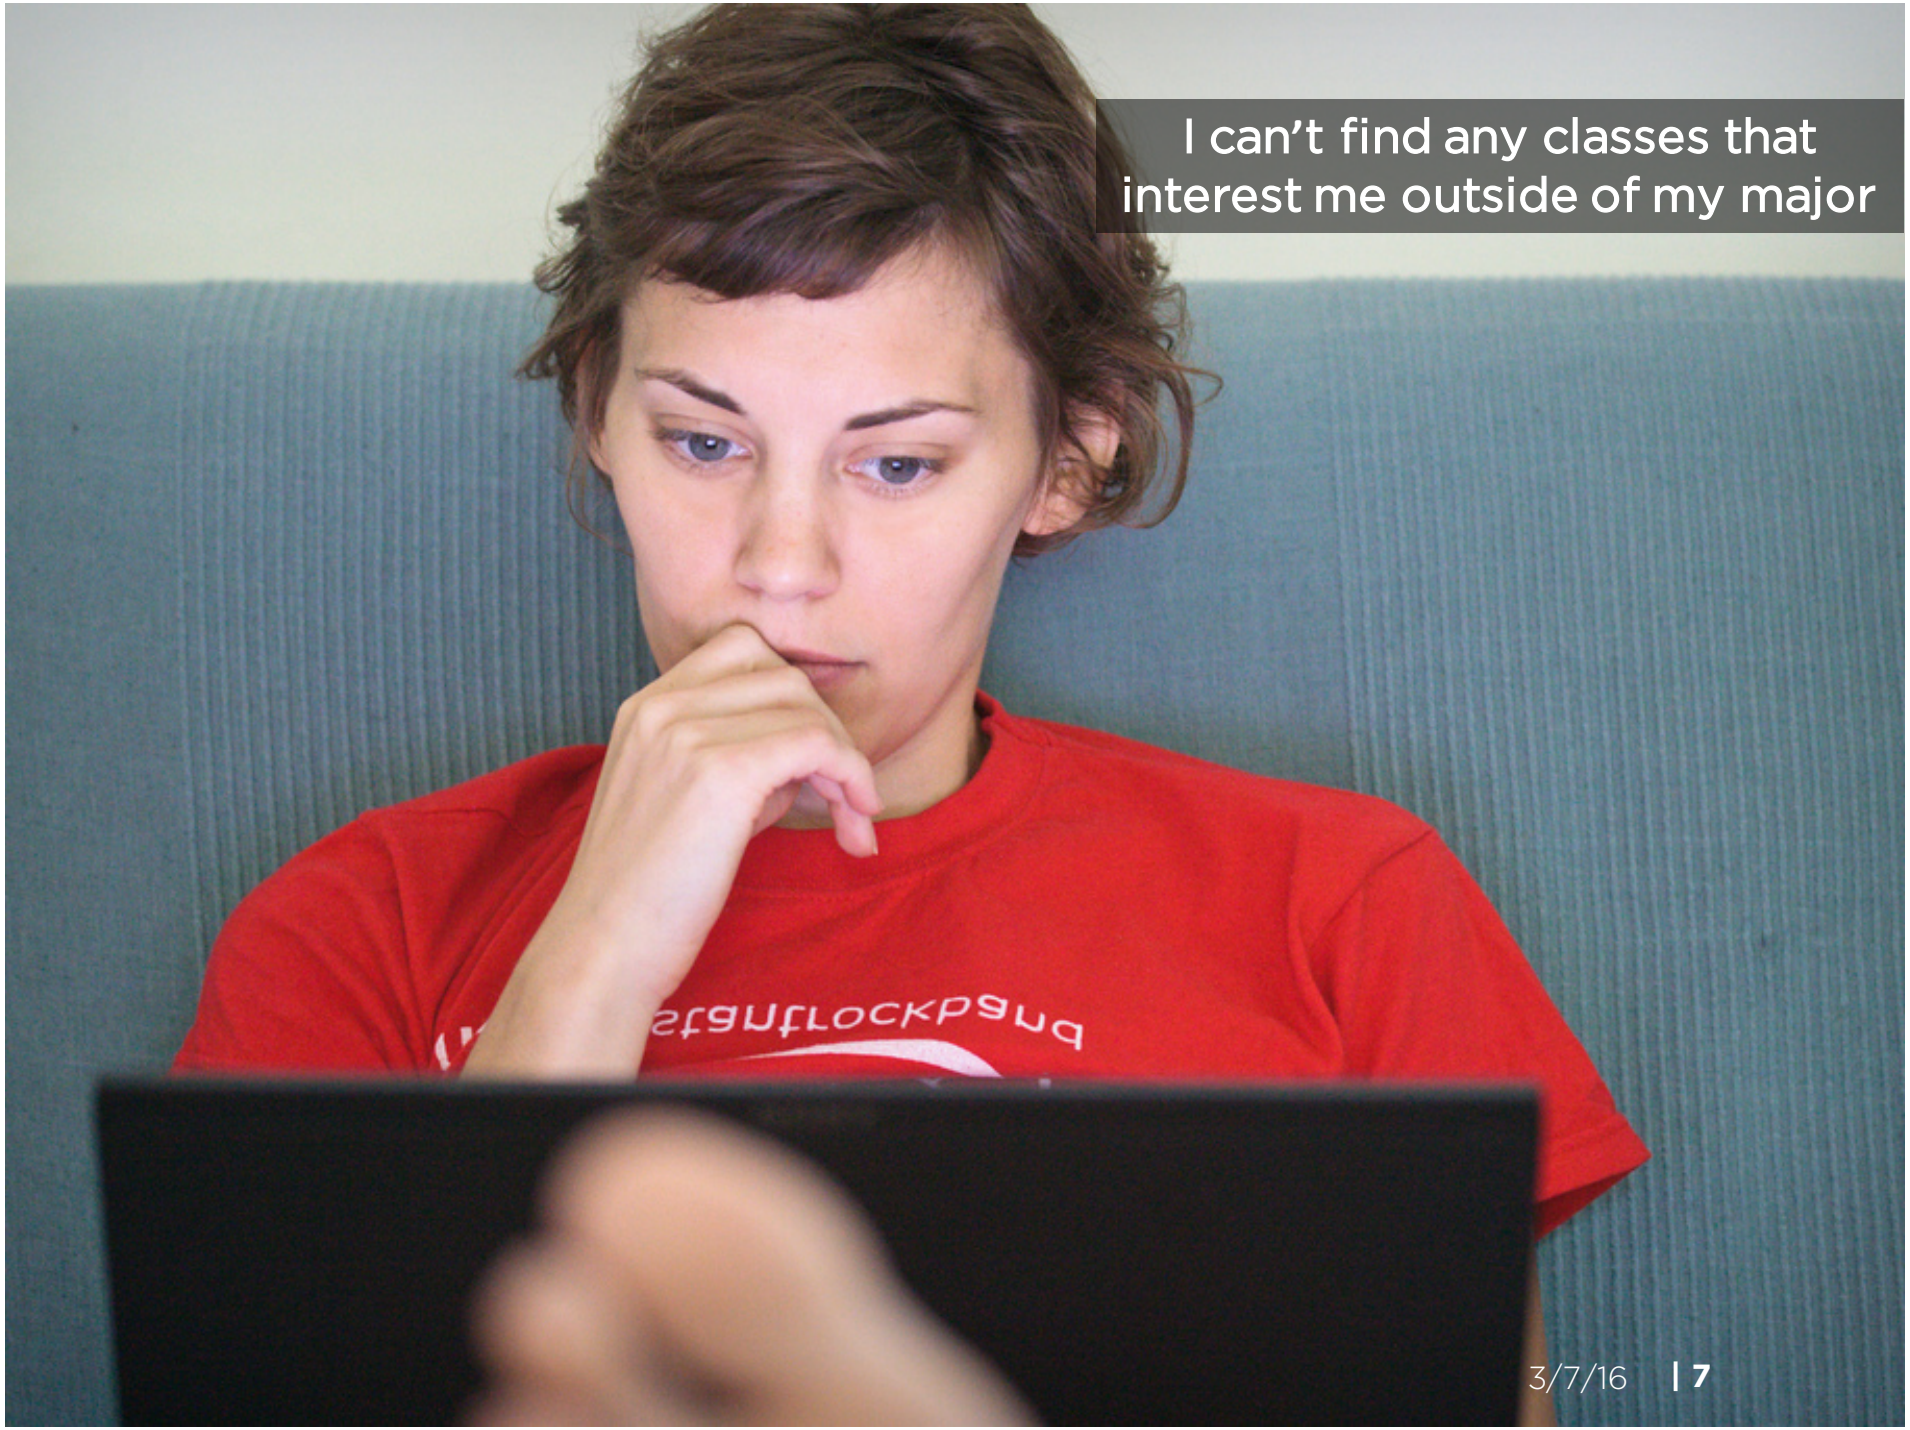

- Usability is today's biggest feature
- Links just don't work; thoughtful integrations matter
- PeopleSoft can do the job – why introduce new technologies?
- Nurture your investment, don't contradict it
- Always look through the user's eyes

DEMO

- Five demos representing key struggles we have seen in the field
- Demos contain no personal data and most are fictitious institutions
- The look and feel is IntraSee's base brand
- These can look very different in the wild

I can’t find any classes that interest me outside of my major

DEMO

- Live Demo (contact us to schedule a reprise)
  - Course Search
  - One-box UX
  - Relevant results
  - Search with and, or, include, exclude and more
  - Integrations: evaluations, bookstores, maps & more
  - Advanced Search
  - Mobile

Grades are in two places, financials in another, planning in a third and on it goes. Why can't there just be one site?
SECURITY
QUIET
php
LARACON
git
NODE

DEMO

- Live Demo (contact us to schedule a reprise)
  - Users want a one-stop shop. Links don't count.
  - The most overlooked aspect of any UX project is integration
  - Reimagine what a student/faculty/advisor center is
  - Meaningful integration to LMS, Evals, Maps, Bookstores, Housing, more
  - Content & Salesforce KB demo
  - Search integration (GSA, Salesforce, etc)

Why can’t building my class schedule be as easy as my Google calendar?

DEMO

- Live Demo (contact us to schedule a reprise)
  - IntraSee Academic Planner
  - This is 100% PeopleTools
    - No messy integrations, security syncs and so on.
  - We fundamentally take a different approach
  - Multiple plans
  - Personal events
  - Search
  - Pinning
  - Warnings, pre-reqs, required components, etc
  - Push to cart
  - iCal & integrations
  - Future terms

Why doesn’t this work on my phone!?!

DEMO

- Live Demo (contact us to schedule a reprise)
  - Students expect everything to be mobile
  - Being mobile goes beyond components
  - Classic vs. Fluid
  - Homepages, Content
  - Integration points
  - Responsive means one code base, many devices

I waste so much time helping students with the web site, I rarely have the time to advise them.

DEMO

- Live Demo (contact us to schedule a reprise)
  - One of the biggest problems in Higher Ed is getting the technology out of the way for meaningful interactions.
  - You improve the advisor/advisee relationship by improving the technology so they don't have to discuss or support bad web sites.
  - One of our clients was terrified that a newly designed site for academic planning would influence students to not see their advisor anymore…
    - Well, the opposite happened. They stopped wasting time on logistics and started using it to talk about academic goals.
  - Advising: See my advisees, search them, view their profiles, enter notes.
  - Advisors are not PS power users. Their time is stretched thin these days. We have to save them time.
